Nintu procurement
# SOFTWARE

The simplest procurement software which saves your time and money.

The best teams use Nintu to eliminate manual work and streamline their purchasing processes, save time and money, and focus on what really matters. This software is developed on base of experiences of procurement companies which know what they really need.

Nintu is a cloud-based procurement solution for proactive spend management. Trusted by cross-industry organizations worldwide to automate procurement work flows and manage PO processes with multi-level approvals, budget control, policy compliance.

WHAT IS
NINTU PROCUREMENT
SOFTWARE?

Nintu is Cloud Based Purchasing Order Software that lets you control and report on all spendings within and outside of your organization.

It's used by multinationals and middle businesses alike to create greater utility on purchasing and costs for the entire company on Project basis. Beside procurement team within the company, procurement companies use Nintu to make purchases in the name of their customers.

As Nintu is cloud based it can be quickly set up for multiple sites and departments without money being spent on additional servers or upgrades to your computer network. It's incredibly easy to set up and roll out without IT staff intervention and quickly pays for itself.

You can also use the system to manage all documents relating to purchasing such as proforma invoices, quotes and contracts. All of the data within the system can also be exported in excel and PDF files.

Nintu gives you chance to track your purchase orders' real time delivery status on the same system. Your procurement team will definitely thank you for such experience based features.
